

Under Our Skin
The Untold Story of Lyme Disease
FREE FILM PRESENTATION

UNDER OUR SKIN is a powerful and often terrifying look not only at the science and politics of the disease, but also the personal stories of those whose lives have been affected and nearly destroyed. From a few brave doctors who risk their medical licenses, to patients who once led active lives but now can barely walk, the film uncovers a hidden world that will astound viewers. While exposing a broken health care and medical research system, the film also gives voice to those who believe that instead of a crisis, Lyme is simply a "disease du jour," over diagnosed and contributing to another crisis: the looming resistance of microbes and ineffectuality of antibiotics. As suspenseful and hair-raising as any Hollywood thriller, UNDER OUR SKIN is sure to get under yours.

Location: Community Center in the Municipal Building
1 Municipal Drive
